

## Agreement with NESTLÉ

### **NESTLÉ and Enertika** sign a PPA agreement for the implementation of a solar park for photovoltaic self-consumption in Reus

- ▶ The project will be carried out via Power Purchase Agreement (PPA) for 10 years
- ▶ The power of the photovoltaic system will be 700 kWp. It is expected to be operational in the first half of 2021
- ▶ The project is part of the company's strategy to reach 20 MW of photovoltaic power in PPA contracts for self-consumption by 2021.

**Barcelona, July 21, 2020.**- On the way to the goal of achieving zero net greenhouse gas emissions by 2050, Nestlé Spain has chosen ENERTIKA to implement a photovoltaic solar farm for self-consumption on the grounds of Nestlé's roasted coffee factory in Reus (Tarragona).

Through this agreement, Enertika will make the investment and operate and manage the facility for the first 10 years, by means of a renewable electricity sales agreement. After this time, the plant will be owned by Nestlé.

This photovoltaic installation located on nearly one hectare of the factory's land will make use of more than 1,500 latest generation pv panels with a total power of more than 700 kWp. Thus, on an annual basis, these photovoltaic panels will provide the factory with the energy equivalent to the consumption of 315 households.

#### **About Enertika**

Enertika is an independent group of energy services, leader in Spain, the Maghreb and Latin America, which offers differentiated and combined solutions under the EaaS (Energy as a Service) business model in energy efficiency and distributed power generation, with the aim of improving energy sustainability and to optimize the energy cost of its clients.

The company is immersed in the development of new projects in the food and beverage sector due to its high potential in distributed generation and energy efficiency.

Enertika's consulting division continues to expand the portfolio of industrial clients with the aim of developing new strategies and decarbonisation Road Maps 2020 - 2030 that allow the intensive industry to move towards the goal of zero emissions while guaranteeing competitiveness.

### **About Nestlé**

Nestlé is present in 187 countries around the world, with 291,000 employees, firmly committed to Nestlé's purpose of improving the quality of life and contributing to a healthier future. Its offer of products and services covers the nutritional needs of people and their pets at all stages of life.

In Spain, Nestlé installed its first factory in La Penilla de Cayón (Cantabria) in 1905. Currently, it has 10 production centers distributed in 5 Autonomous Communities. 56% of the total Spanish production is destined for export, mainly to other countries in Europe.

With a turnover of 1,995 million euros and an average workforce of 4,020 people in 2019, Nestlé leads the Spanish food market with a wide range of products: baby food, dairy products, chocolates, coffee and cereal-based beverages, culinary, cereals for breakfast, mineral waters, clinical nutrition specialties and pet food.
